BOTDAWN · THE DAWN OF EVERYDAY AI

BotDawn

Practical technology, told from the start. A morning briefing, not a launch page.

Color, type, logo, layout, components, and the rules that keep Nepali and English in the same family.

PAPER	INK	CLAY	FOREST
#F6F3EC	#1C1915	#9A3412	#1B4A38

HOW TO USE THIS BOOK

The system, in one place.

These are the colors, typefaces, and rules already used by BotDawn. Names match the CSS tokens. Build new screens from this book. Do not invent a second palette.

01 Cover — The four colors
02 How to use — This page
03 Brand — Name, audience, character
04 Voice — English and Nepali
05 Color, light — Palette
06 Color codes, light — HEX, RGB, HSL
07 Color, dark — Palette and codes
08 Color in use — Pairs and jobs
09 Typography — Four families
10 Type scale — English and Nepali
11 Logo — Mark and wordmark
12 Layout — Grid, space, radius
13 Components — Buttons, fields, cards
14 Patterns — Pages and imagery
15 Accessibility — Focus, motion, icons
16 Reference — One-page sheet

USEFUL OVER NOVEL

If a reader cannot act on it this week, it does not lead. The interface should feel the same way: quiet, specific, ready to use.

SOURCES OVER RUMORS

Briefs point outward. Color and type should point to the words, not compete with them.

BOTH LANGUAGES

Nepali is the default. English is equal. Each language gets its own type, the same colors, and the same respect.

Character of the desk: warm paper, dark ink, a clay action, a forest label. Editorial, like a well-printed briefing. Default theme is light. Dark follows the system until a reader chooses.

BRAND

The dawn of everyday AI.

BotDawn is named for the dawn of everyday AI. The word stays Latin in both languages. Only "Dawn" takes a second color: ember on paper, dawn in the dark theme.

WHAT IT IS

A bilingual media desk for practical AI, automation, social platforms, and growth. Episodes, news, opinion, guides, and tools a person can copy.

Nepali lives at the root. English lives at /en. Both are first-class editions, not a translation pasted on afterwards.

WHO IT IS FOR

Solopreneurs, freelancers, local shops, creators, and Nepali operators in the diaspora. People who sell a skill or a service with a small team.

The reader is busy. The page owes them the next step, a source, and a way to leave with something usable.

PROMISE

Save time. Give the next practical step.
Treat both languages as serious.
मानिसको समय जोगाउने। अर्को व्यावहारिक कदम दिने।

PERSONALITY

- Calm, sourced, and warm.
- Short sentences. Concrete nouns.
- A desk, not a billboard.
- Paper and ink, with one heat of clay.
- Forest for labels. Clay for the action.

Imagery

SHOW

Real work: workspaces, tools, streets, screens, hands. Warm and slightly quiet, so the photo can sit on paper. Episode frames are 16:9. Every image has alt text.

PLAY MARK

A white circle, 44px, ink icon, soft shadow, sitting on the photograph. The photograph stays a poster until the reader presses play.

LEAVE OUT

Neon gradients, glassmorphism, 3D mascots, fake host portraits, and stock handshakes. The about photo is a workspace until a real portrait exists.

VOICE

Write the way the desk edits.

Headlines are short. The second line can carry the clay. Eyebrows name the section. Buttons are verbs.

ENGLISH · HOMEPAGE

Less hype.
More useful next steps.

BotDawn follows technology, social media, AI, and automation — and how people actually use them.

Read today's brief | Get the letter

नेपाली · गृहपृष्ठ

BotDawnले प्रविधि, सामाजिक सञ्जाल, एआई र अटोमेसन हेर्छ — मानिसले ती कसरी चलाउँछन् भन्नेसहित।

आजको संक्षिप्त पढ्नुहोस् | पत्र पाउनुहोस्

DO THIS

- Lead with the useful fact, then the source.
- Name the next action in the button.
- Keep eyebrows as categories: News desk, Deep dives, Today's brief.
- Write Nepali as its own edition. Match meaning, not word order.
- Use the em dash the way the product does, for a short turn in a sentence.

LEAVE THIS OUT

- Hype words: unlock, seamless, revolutionize, supercharge, game-changer.
- Empty intensifiers and exclamation marks.
- Rumors without a link out.
- English headlines set in the Devanagari fonts, or Nepali headlines set in Newsreader.
- All-caps sentences. Capitals are for eyebrows only, and only in English.

COLOR · LIGHT

Paper, ink, clay, forest.

Light is the default. The page is warm paper. Text is near-black ink. Clay is the one hot color. Forest labels the sections.

Paper	Ink	Card	Quiet
#F6F3EC	#1C1915	#FFFCF7	#EFEAE1
-background The page.	**-foreground** Primary text.	**-card** Raised surface.	**-muted** Hover and wells.

Clay	Forest	Night	Wash
#9A3412	#1B4A38	#17352B	#F3E6D4
-accent Buttons and links of emphasis.	**-forest** Eyebrows and section labels.	**-band** Newsletter and dark bands.	**-highlight** Soft emphasis.

STONE	LINE	ON CLAY	ON FOREST
#5C564E	#E3DCD0	#FFFAF5	#F4FAF6
-muted-foreground. Secondary text. 6.54:1 on paper.	-border. Hairlines. Always pair a card with this line.	-accent-foreground. Text on clay buttons. 7.04:1.	-forest-foreground. Text when forest is a fill.

A 3px clay rule sits on the top edge of the sticky header. Repeat that rule when a surface needs the BotDawn signature, and nowhere else as decoration.

COLOR CODES · LIGHT

Every light token.

Contrast is the pair a reader actually sees. AAA is 7:1 or better. AA for body text is 4.5:1.

	NAME	TOKEN	HEX	RGB	HSL	CONTRAST
	Paper	background	#F6F3EC	246 243 236	42 36% 95%	Page field
	Ink	foreground	#1C1915	28 25 21	34 14% 10%	15.80 AAA
	Card	card	#FFFCF7	255 252 247	38 100% 98%	Surface
	Card ink	card-foreground	#1C1915	28 25 21	34 14% 10%	17.11 on card
	Quiet	muted	#EFEAE1	239 234 225	39 30% 91%	Fill, hover
	Stone	muted-foreground	#5C564E	92 86 78	34 8% 33%	6.54 AA
	Line	border	#E3DCD0	227 220 208	38 25% 85%	Hairline only
	Clay	accent	#9A3412	154 52 18	15 79% 34%	6.59 AA
	On clay	accent-foreground	#FFFAF5	255 250 245	30 100% 98%	7.04 AAA
	Forest	forest	#1B4A38	27 74 56	157 47% 20%	9.10 AAA
	Mist	forest-foreground	#F4FAF6	244 250 246	140 37% 97%	On forest fills
	Wash	highlight	#F3E6D4	243 230 212	35 56% 89%	Soft block
	Night	band	#17352B	23 53 43	160 39% 15%	Dark section
	On night	band-foreground	#F6F3EC	246 243 236	42 36% 95%	11.99 AAA
	Focus	ring	#9A3412	154 52 18	15 79% 34%	2px, offset 3px
	Select	::selection	#E7C4A8	231 196 168	27 57% 78%	Ink 10.72
	Ember	logo .dawn	#C2410C	194 65 12	17 88% 40%	4.67 large only
	Dawn	word Dawn	#E8A06A	232 160 106	26 73% 66%	Dark accent

Stone on card is 7.08:1. Clay on card is 7.14:1. Ember is the wordmark “Dawn” in light mode. Dawn is the wordmark “Dawn” in the dark theme, and the clay of dark mode. Radius of the system is 12px, stored as –radius: 0.75rem.

COLOR · DARK

The same metals, at night.

Dark is not an invert. Paper becomes a warm black. Clay lightens to dawn so it can be read. Forest becomes a pale leaf.

Field	Parchment	Card	Dawn
#100F0D	#F4EFE6	#1B1916	#E8A06A
-background	-foreground	-card	-accent

	NAME	TOKEN	HEX	RGB	HSL	ON FIELD
	Field	background	#100F0D	16 15 13	40 10% 6%	Page
	Parchment	foreground	#F4EFE6	244 239 230	39 39% 93%	16.73 AAA
	Card	card	#1B1916	27 25 22	36 10% 10%	Surface
	Quiet	muted	#26231F	38 35 31	34 10% 14%	Hover
	Stone	muted-foreground	#B7B0A4	183 176 164	38 12% 68%	8.90 AAA
	Line	border	#34302A	52 48 42	36 11% 18%	Hairline
	Dawn	accent / ring	#E8A06A	232 160 106	26 73% 66%	8.82 AAA
	Espresso	accent-foreground	#1C120C	28 18 12	22 40% 8%	8.47 on dawn
	Leaf	forest	#9DCCB6	157 204 182	152 32% 71%	10.72 AAA
	Deep	forest-foreground	#102019	16 32 25	154 33% 9%	On leaf fills
	Wash	highlight	#2A241C	42 36 28	34 20% 14%	Soft block
	Night	band	#10241D	16 36 29	159 38% 10%	Paper 14.67
	On night	band-foreground	#F6F3EC	246 243 236	42 36% 95%	Unchanged

Stone on a dark card is 8.15:1. Selection stays #E7C4A8 with ink #1C1915 in both themes. Sans “Dawn” switches from ember #C2410C to dawn #E8A06A.

COLOR IN USE

One job for each color.

GIVE THE COLOR THIS JOB

- **Paper** — pages, and text on night bands.
- **Ink** — titles, body, the logo mark, primary text.
- **Card** — grouped content. Always with a line.
- **Quiet** — hover, pressed nav, empty wells.
- **Stone** — dates, ledes, secondary sentences.
- **Clay** — one primary button, the header rule, a headline's second line, the focus ring.
- **Forest** — eyebrows and small labels only.
- **Wash** — a rare soft block, never a button.
- **Night** — one closing band, such as the newsletter.

KEEP THESE BOUNDARIES

- Links are ink or clay, with an underline. They are never blue.
- Do not paint a whole page clay, forest, or dawn.
- Dawn text sits on field or night. It does not sit on paper.
- Ember is the sans "Dawn" in light mode, at display size.
- Do not use pure black #000 or pure white #FFF as a page.
- Do not add a fifth brand hue. Status can use forest for success language and clay for emphasis. There is no separate error red in the brand palette; if a form needs an error, use clay and a sentence.
- Borders are structural. A card without its line disappears into the paper.
- Selection is always #E7C4A8 with ink text.

TYPOGRAPHY

Two languages, four families.

English display is a literary serif. English UI is a plain grotesque. Nepali display is a Devanagari serif. Nepali reading text is a Devanagari sans.

NEWSREADER · DISPLAY AND ARTICLES

From the start.

Practical tech, from the start.

Variable, optical sizing on. Weights in use: 450–500 for headlines, 650 for strong in prose. The product logo is Manrope 700. Tracking −0.022em on display. Fallback: Georgia, then ui-serif.

MANROPE · INTERFACE

Read today's brief

UI, navigation, buttons, labels, and English body outside articles. Weights 400, 500, 600, 700. Buttons are 600. The sans logo is 700 at tracking −0.055em. Fallback: ui-sans-serif, system-ui, sans-serif.

NOTO SERIF DEVANAGARI · नेपाली शीर्षक

सुरुदेखि।

Headings when the document language is Nepali: h1, h2, h3, and .font-display. Weights 500, 600, 700. Letter-spacing stays 0. Line-height opens to about 1.45.

NOTO SANS DEVANAGARI · नेपाली पाठ

नेपाली पछि थपिने अनुवाद होइन। अङ्ग्रेजी मात्र गम्भीर संस्करण होइन।

Body and article text in Nepali. Weights 400, 500, 600, 700. Article line-height 1.95. The page font switches to this family on html[lang="ne"].

STACKS, AS IMPLEMENTED

```
UI · var(--font-manrope), var(--font-noto-sans), ui-sans-serif, system-ui, sans-serif
Nepali UI · var(--font-noto-sans), var(--font-manrope), sans-serif
Display · var(--font-newsreader), var(--font-noto-serif), ui-serif, serif
Nepali display · var(--font-noto-serif), var(--font-newsreader), serif
Article · Newsreader 18px / 1.75 · Nepali article · Noto Sans 18px / 1.95
```

TYPE SCALE

Sizes, with their jobs.

ROLE	SIZE	LEADING	FACE AND WEIGHT	SAMPLE
Hero	36 / 48 / 54	1.08	Newsreader 500, −0.022em	Less hype.
Page title	36–48px	tight	Display 500	Worth reading
Section	30–36px	1.15	Display 500	News desk
Card title	20–24px	tight	Display 500	Episode title
Menu logo	23 / 26	1	Manrope 700, −0.055em	BotDawn
Lede	18–20px	1.6	Manrope 400, stone	The next step.
Article	18px	1.75	Newsreader 400	Long reading.
UI body	16px	1.5	Manrope 400–500	Navigation, lists
UI small	14px	1.45	Manrope 400–600	Meta, buttons
Eyebrow	12px	1.35	Manrope 600, forest	NEWS DESK
Nepali hero	same px	1.3–1.45	Noto Serif, tracking 0	हाइप होइन।
Nepali body	16–18px	1.85–1.95	Noto Sans 400	सुरुदेखि।

ENGLISH MEASURE

Hero and ledes sit in a column near 36rem. Articles cap at 65 characters (max-w-prose) inside a 42rem column, with a 16rem contents rail from the large breakpoint. Eyebrow tracking is 0.18em on the hero, 0.16em on sections, 0.14em on meta. Underlines sit 0.18em under article links, in clay at 75% strength.

NEPALI MEASURE

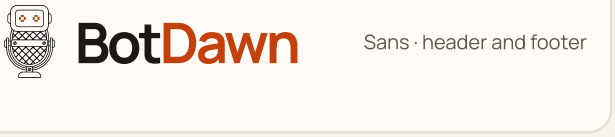

Do not letter-space Devanagari. Headlines use Noto Serif even when the English page would use Newsreader. Article headings use line-height 1.45. Body copy needs the taller line, 1.95, so matras are not crowded. Buttons may be longer. Let them wrap. Do not shrink Nepali below the English size to force a fit.

Article h2 is 1.7rem, margin-top 2.75rem. Article h3 is 1.3rem, margin-top 2rem. Paragraphs, lists, and quotes open with 1.15rem. Strong inside prose is weight 650. Anchor targets sit 5.5rem below the sticky header.

LOGO

A microphone, and a bot.

The mark is a microphone with a robot face: black line art, orange eyes, on a clear field. The word stays BotDawn in Latin, in both languages of the site. Header and footer use this same lockup.

CONSTRUCTION

Line art on a clear field. The eyes stay orange. In the header the mark is 56px tall and 40px wide. On a phone it is 48px tall. The app icon sets this mark on a paper tile.

LOCKUP

Gap between mark and word is 10px. The word is Manrope 700, tracking −0.055em, 1.25rem on a phone and 1.6rem from 640px. “Bot” is the text color. “Dawn” is ember #C2410C on paper and dawn #E8A06A in the dark theme.

CLEAR SPACE AND SIZE

Keep clear space of at least 10px. Do not draw the mark under 32px tall. Do not set the wordmark under 20px. Do not stack the word. On a dark field, invert the black lines and rotate the hue so the eyes stay orange.

USE

BotDawn

Header and footer. Ember only in Dawn.

USE

BotDawn

Dark theme. The warm orange only in Dawn.

AVOID

BotDawn

Whole word in clay, or in forest.

AVOID

बोटडन

Devanagari belongs in copy, not inside the logo.

The link is named BotDawn. The mark and the word are hidden from assistive tech so the name is not read twice. Social card, 1200×630, 72px padding, paper field. The microphone mark, then BOTDAWN in tracked capitals. Headline in display, about 76px: “Practical tech, from the start.” Deck in stone. Footer in forest: Nepal · Diaspora · United States.

LAYOUT

A narrow desk, generous paper.

CONTAINER

Max width 1152px (72rem). Page padding 16px, then 24px from 640px, then 32px from 1024px. The page is centered.

BREAKPOINTS

Small	640px
Medium	768px
Large	1024px
Wide	1280px

Navigation appears in the header from large. Search field appears from medium. Below that, both move into the menu.

SPACE · 4PX BASE

4 · 8	Icon gap, tight stacks
12	Button groups, card grids
16	Card padding, default gap
24	Inside sections
40	Hero bottom, footer columns
56 · 64	Section padding

Header is 64px under a 3px clay rule, sticky, z-index 40, paper at 90% with a blur. Footer begins 64px after the last section.

Radius and elevation

SMALL · 8PX

–radius-sm. Rare, for tiny wells.

CONTROL · 10PX

–radius-md. Buttons, inputs, menu.

CARD · 12PX

–radius and rounded-xl. Cards, sheets.

PILL

Full radius. Tags and the play button.

LEVEL 0

The paper page. No shadow.

LEVEL 1

Card fill plus a 1px line. This is the normal surface. Do not add a shadow.

LEVEL 2

Menus only. Line, card, and a soft shadow. The play disc uses a smaller shadow.

COMPONENTS

Controls you can reuse.

BUTTONS · 14PX, WEIGHT 600, RADIUS 10PX

Primary | Outline | Ghost | On night | Disabled

Default height 44px, padding 16px. Small height 36px, padding 12px. Icon button 44×44. Primary is clay with #FFFAF5. Outline is card plus line. Ghost is text, quiet on hover. Inverse is paper text in night, used on dark bands. Hover on primary is clay at 90%. Disabled is 50% opacity and cannot be focused as an action.

FIELDS

Search BotDawn /

What do you need?

Height 40px in the header, 44px in the menu and on forms. Radius 10px. Card fill, line border, 14px type, 16px on phones. Label is always present, visible or for screen readers. Focus is a 2px clay ring, 3px outside the control.

TAGS, LINKS, NAV

AI | Nepal | नेपाल

Browse the desk · text link, offset 4px

Podcast News · Articles · Tools

Tags are pills, 12px medium, line border. Active nav is ink. Resting nav is stone. Cards highlight their border to clay on hover. Article links underline in clay.

SERIES

Episode title

12 min

01 · Nepal

A brief with a source.

One sentence on why it matters.

HEADER ANATOMY

3px clay rule. 64px bar. Sans logo. Links from 1024px. Search from 768px. Language, theme, then menu. Press / to focus search.

PATTERNS

How a page is built.

HERO

Eyebrow in forest. Display title, often two lines, the second in clay. A lede in stone at 18px. Two actions: clay, then outline. Three path cards underneath. On large screens the title column is slightly narrower than the video.

SECTION

A top line separates sections. Title in display at 30–36px. A one-line lede. A text link at the right: “Browse the desk”. Cards in one, two, or three columns.

BRIEF

A numbered list, 01 and the region in stone, the title in medium, the summary in stone at 14px. The whole row is a link.

ARTICLE

Display title. A contents list on large screens. Reading progress. Prose at 18px. Quotes take a 2px clay rule and stone text. Related work sits below a line.

RESOURCE

Type label in forest. Display title. A short description. Actions are copy, download, or print. The tool should be usable the day it is opened.

CLOSE

The newsletter is the night band: eyebrow at 70% paper, display title, deck at 80%, and an inverse button. The footer is a card-colored field with the same sans logo as the header.

Content frames

PODCAST

16:9 poster, play disc, series, title, date and minutes.

NEWS

Category, title, summary, why it matters, source link, tags.

TOPICS

Pills lead to a topic page. Labels exist in both languages.

EMPTY

Say what happened and offer the next step. “No matches yet” is a sentence, plus a way to ask.

ACCESSIBILITY, MOTION, ICONS

Readable before it is clever.

FOCUS

Remove the browser outline, then draw :focus-visible as 2px solid ring, 3px outside. The skip link appears on focus, fixed, paper, above the header at z-index 70. Every control has a name.

TARGETS

Primary controls are 44px tall. Icon buttons are 44×44. The compact 36px button is for dense header tools, not for the main action on a phone.

CONTRAST

Ink, clay, forest, and stone on paper all clear AA. Ink, forest, and night pairs clear AAA. Do not set stone smaller than 12px for meaning. Do not put dawn on paper.

MOTION

- Hero entrance: fade and 10px rise, 450ms, ease-out, once.
- Color changes on hover are short. No bounce, no parallax, no looping motion.
- Scroll is smooth. Headings leave 88px of room under the sticky bar.
- If the reader prefers reduced motion, scroll is instant and animation duration collapses.

ICONS

Lucide, stroke about 2. 16px inside buttons and the play icon. 20px for the menu icon. Icons inherit the text color. The play triangle is filled. Decorative icons are hidden from assistive tech. A control that is only an icon still has a label.

THEME AND LANGUAGE

- Light is the default. The system preference applies until a person chooses Light or Dark.
- The choice is stored as botdawn-theme.
- The document language follows the edition. Nepali switches the body font.
- Do not rely on color alone. Pairs of label plus color, and a border plus a fill, carry the state.

KEYBOARD

Slash focuses search when the reader is not already typing. Forms announce their result. Print hides the header, footer, and anything marked no-print, and sets the page to black on white.

CHECKED PAIRS

```
Ink on paper 15.80 · Stone on paper 6.54 · Clay on paper 6.59 · On-clay 7.04 · Forest on paper 9.10 · Paper on night 11.99
